HYDROTHERAPY

Water is known as the essential health cleansing element. Its natural minerals with restorative and detoxifying properties helps revitalize the body. With the help of Water Jet Massage or Hydrotherapy, one can reboot and be relieved of some common health disorders. This therapy entails point-to-point pressure through water bursts in warm, cool, or an invigorating contrast of both. Heat soothes the body, slowing down the activity of internal organs. Cold, in contrast, stimulates and invigorates, increases the internal activity of organs. And with Queo's Wellness Collection, Hydrotherapy unburdens the mind and revives the spirit.

THE TECHNOLOGICAL EDGE

ACTIVE SAFETY SYSTEMS

QUEO features an RCD (Residual Current Device) as standard. The RCD immediately stops electrical flow to the unit, if it detects a short circuit, lack of water supply or overheating.

WATER LEVEL SENSOR

QUEO features a Water level Sensor as standard. The motor will not come into action if the water level is below the water jet level.

ABSOLUTE QUALITY OF RAW MATERIALS

QUEO uses a pure Lucite Acrylic that is rigid and notably scratch-resistant. Not just that, it is also impervious to acids, grease and water.

Queo's obsession with using only top-quality materials ensures long lasting good looks.

MICRO-NANO BUBBLE SKIN CARE SYSTEM

Negatively charged micro nanobubbles attract bacteria, and when they break, they create heat and hydroxyl radicals that destroy those bacteria. Taking a micro nanobubble bath regularly can prove good for skin detoxification and dermatoses improvement.

 - Use a soft dampened sponge or cloth to clean, never use abrasive material like a bristle brush or scouring pad.
 - Do not use cleaners containing ammonia, bleach, or acid. Most toilet cleaning products have high acidic content which can damage the chrome finish; hence they should not be used to clean chrome finish.
 - Use a mild detergent (such as dishwashing soap). Do not use abrasive cleaners.
 - Rinse and be sure to wipe the entire surface dry.
 - Do not use cleaners containing ammonia, bleach, or acid. Most toilet cleaning products have high acidic content which can damage the chrome finish; hence they should not be used to clean chrome finish.

The ideal cleaning technique is to always blow dry water from metal surfaces. Allowing water to evaporate on metal will form water deposits. It is important to use a dabbing action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and buff drying should keep your faucet safe.
