SOFT NIGHT LAMP
Turn the light On or Off

SENSOR SEAT COVER

REMOTE CONTROL

It is designed to be operated by remote control. You can choose the remote control to use different Automode functions instead of using the mainframe button on the side of the water closet.

USAGE
Confirm power plug is well plugged into the electric outlet and the indicator light is on. Open the shut off valve. Insert the battery into remote control and switch on. Press the power button on the panel or turn on the power by remote control; also confirm that power LED on the toilet is on otherwise it cannot be operated. Use the water closet completely as per your discretion.
